Telecom Product, Consultancy and Service offering

Corporate Overview

We are a large Telecom PLC company working in partnership with J6 Ltd who are passionate about making your business better through integrated IT and Communications and pride ourselves in the world-class customer service we provide, working in partnership with our customers to understand their strategy and what drives their business.

Our technical expertise is delivered through five key divisions each of which provides specific knowledge and skills to the market.

Land Line Telecom provides high quality Business Telephony services to both the Public and Private sectors. We provide 5 Core Telecoms Solutions: *Voice, Inbound, Broadband, Systems and Business Solutions.*

This is all underpinned by our commitment to world-class customer service, concentrated on proactive account management, service delivery, cost analysis, Online and E-billing all delivered from UK based customer service centres. Our Telecom's specialist knowledge combined with our relationship with BT Wholesale ensures that we can provide the solutions and support organisations need when looking to maximise the benefits of the latest telecoms products and services.

Mobile is a leading Service Provider and Distributor for mobile voice and data services including all five major mobile network operators: 3, O2, Orange, T-Mobile and Vodafone as well as Blackberry solutions.

As a result we are able to offer standard and bespoke voice and data solutions to business customers with a full range of voice and data handsets. In addition, our expert team can advise your business, whatever the industry or whatever the size, on selecting the right voice and data solution to meet your business needs.

Converged Solutions offers complete communications infrastructure solutions that aim to enhance business performance and deliver real benefits. From the design and installation of structured cabling works through to fully integrated intelligent buildings solutions, we have the technical expertise, business knowledge and project management skills to meet the needs of your business today and to help you to plan for the future.

Our vendor independence ensures that we have the flexibility to always specify the most appropriate solution for your organisation's bespoke requirements. However, what really makes us different is our ability to develop genuine partnerships with our clients, take ownership of projects and provide expert, independent advice to deliver optimum solutions.

Managed Solutions provides a comprehensive portfolio of infrastructure and Internet Services suitable for all businesses and public sector organisations. Our extensive portfolio of solutions and services includes: *Data Storage and Security, Microsoft Desktop & Server Consultancy & Support and ISP and Communications Services*

We offer business class reliability & affordability in complete IT solutions designed to enable our customers to focus on running their business in the knowledge that critical business data and systems are fully protected and professionally managed & serviced.

Technology is a leading supplier of Business Critical servers, Enterprise Server and Storage solutions, Engineering Support Services and Professional Services and Consultancy. We take the time to fully understand the challenges faced by a client's business and then we develop clear end-to-end data management strategies, which are designed to conquer these challenges.

Turning cost into profit

Professional Services underpin everything we do, with our Professional Services and Consulting division providing design, consulting, analytical and implementation services. We specialise in the area of SAN and storage consulting and design, design of mission critical server solutions, project management, and offer an unrivalled level of expertise in delivering business continuity solutions and clustering.
