Utilities

1. Unrivalled combination of financial markets, energy trading, Utility plc and Top 4 management consulting experience
2. Use of capital markets analysis tools in carrying out independent, unbiased and intelligent interpretation of forward energy curves
3. Direct access to all major UK energy trading desks
4. Best practice contract negotiation – review your half hourly reading profile and match it with the most competitive cost and contract effective date, to maximise the savings
5. One point of contact for any Utility related issue with immediate access to experienced industry specialists
6. Manage the utilities account on your behalf and check, approve and pass for payment, future electricity and gas invoices on your behalf
7. Expert data manipulation, analysis and billing validation
8. Independent of all Suppliers but close working relationships at ALL levels
9. Detailed operational knowledge of UK energy trading arrangements and Suppliers' delivery capabilities
10. Bespoke forward energy strategy determination and implementation including; scenario modelling, price triggers, technical and operational tactics, energy efficiency measures etc
11. Providing extensive technical data monitoring performed to highlight operational efficacy and ensure you never over pay against your contractual commitments
12. Offering truly bespoke solutions that perfectly mirror your company' business requirements in a way that will provide your company with confidence over future energy costs and service delivery
13. Awareness and understanding of Supplier product ranges and applicability to Customers' operational requirements/risk appetite
14. Assist and action all aspects of new connections and disconnections of metering and its associated requirements
15. Informed provision of market intelligence – provide a fully comprehensive report combined with market knowledge information
16. We are able to carry out all aspects of an Energy and Carbon management program in keeping with the organisation's Environmental Policy, including Carbon Trust Accredited site and energy audits, direct and indirect emissions reduction activity, utility contract analysis, review and negotiation, energy and carbon data collection, best practice carbon offsetting products and sophisticated risk management of the energy portfolio to take full advantage of market conditions.

Some of our clients include Blacks Leisure, Shepherd Construction, Portakabin and many others.

Turning cost into profit
